ABOUT ME

My love for integrating technology with design led me to study web development at the University of Central Florida.

Passionate about problem-solving and never-ending learning, I am excited to dive into the world of web and continue refining my skills with the right company.

PROJECTS

Language Learning App Product Design

- Collaborating with the team to create user-friendly interfaces for language learning app
- Conducted user testing and feedback sessions to refine and improve the user experience
- Currently in development

Personal Portfolio using Bootstrap

[Link to the website](#)

- Created an attractive UI using Figma, Bootstrap and JS to display professional info such as skills, projects, and contact details in an organized and user-friendly format

Weather App using Vanilla JS and API

[Link to the website](#)

- Developed a web application using HTML, CSS, and JavaScript that displays live weather information for any selected city or the user's current location through the use of Open API
- Created an intuitive UI with CSS and JS to easily navigate between cities and view temperature, humidity, and wind speed
